Name: NorthStar Recipe Viewer (Long Term Preview)

Version: 1.1.1.316

Publisher: NorthStar Enterprise

Notes: The Portal patch is a zip file. It must be run over an existing recipe portal folder. Always make a backup of your recipe portal folder before installing. All previous fixes are in the most current patch.
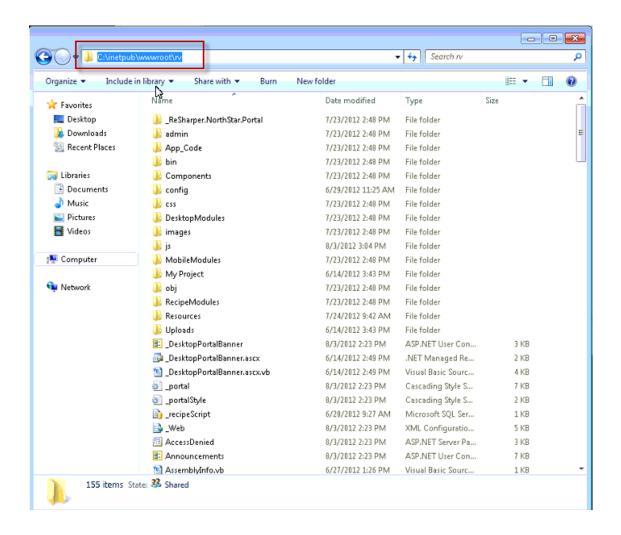

The following prerequisites are required:

- Microsoft .NET Framework 3.5

NorthStar Recipe Viewer Portal Downloads:

- NorthStar Recipe Portal Install
- NorthStar Recipe Editor
- NorthStar Recipe Portal Patch
- Microsoft Report Viewer Redistributable 2005

- Installation Instructions for Recipe Viewer Portal Upgrade:
  1) Download the latest Recipe Viewer Portal located in

     Preview Links
     http://rvrapidreleasepreview.cbsnorthstar.com

---

  2) Extract the contents of the zip file downloaded into your Recipe Viewer Portal folder in the server. They are normally located in c:\inetpub\wwwroot\rv folder (Note: If you made any customizations to any css files or ascx files to change fonts or colors in the portal folder, it may be over written.)

3) Restart IIS.

4) Once the portal folder has been upgraded, you will then need to launch the recipe editor to complete the upgrade. *(Note: if the SQL User client used in the Recipe Editor Setup does not have any Database Owner and SysAdmin rights to the database, you may get an error while logging in.)*

- Recipe Viewer Portal Install Full Install:
